An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 72-81 have been canceled as being drawn to a non-elected invention.

The following is an examiner's statement of reasons for allowance:

Claims 27-35, 37-49, and 58-71 define over the art of record in that none of the art teaches calibrating an in vivo sensor by generating first and second elements at first and second times, and sensing a constituent level. Claims 51-56 are allowable in that none of the art calibrates an in vivo sensor by generating a changing h+/oh_ environment around the electrode. Claims 36 and 50 are allowable for the reasons given in the previous office action.

With respect to claim 59, it is clear that the method of calibrating is controlled electronically via a processor and therefore there is code to cause operation of each of the steps (see page 44).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
